

Income Fund

E CLASS ACCUMULATION AND INCOME SHARES

Morningstar Rating™ ★★★★★

Fund Description

The primary investment objective of the Fund is to seek high current income, consistent with prudent investment management. Long-term capital appreciation is a secondary objective.

The Income Fund is a portfolio that is actively managed and utilizes a broad range of fixed income securities that seek to produce an attractive level of income with a secondary goal of capital appreciation.

This fund seeks to meet the needs of investors who are targeting a competitive and consistent level of income without compromising total return. The fund aims to achieve this by employing PIMCO's best income-generating ideas across global fixed income sectors with an explicit mandate on risk-factor diversification. The fund offers daily liquidity.

The Fund may use or invest in financial derivatives.

The fund taps into multiple areas of the global bond market, and employs PIMCO's vast analytical capabilities and sector expertise to help temper the risks of high income investing. This approach seeks to provide consistent income over the long term.

ABOUT THE BENCHMARK

Bloomberg U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

Past performance is not necessarily indicative of future performance. The benchmark is the Bloomberg U.S. Aggregate Index All periods longer than one year are annualised. SI is the performance since inception. ¹ Performance shown is on a NAV-to-NAV basis in the denominated currency, excluding the preliminary charge and on the assumption that distributions are reinvested, as applicable. ² Performance shown is on a NAV-to-NAV basis in the denominated currency, taking into account the preliminary charge and on the assumption that distributions are reinvested, as applicable. A preliminary charge of up to 5% may or may not be deducted from the subscription amount depending on the distributor from whom you had purchased shares, as such this may not represent actual performance returns. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations.

Countries are categorized by currency of settlement. EMU-member countries reflect the country of exposure for EUR-denominated securities. Europe represents European Union instruments that cannot be separated by specific country.

©PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment. Annualised Distribution Yield is as of last month ending 07/31/2023. The dividend distribution rate/yield is based on historical dividend rate/yield. The dividend amount or dividend rate/yield is not guaranteed. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund. Source: PIMCO, index provider for benchmark data. Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. ^AWhere permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. **Dividends are payable out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.** PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security. ^BNet Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position. ^CShort duration emerging markets instruments includes an emerging market security or other instrument economically tied to an emerging market country by country of risk with an effective duration less than one year and rated investment grade or higher or if unrated, determined to be similar quality by PIMCO. Emerging Markets includes the value of short duration emerging markets instruments previously reported in another category. ^DMay include nominal and inflation-protected Treasuries, Treasury futures and options, agencies, FDIC-guaranteed and government-guaranteed corporate securities, and interest rate swaps. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2023 Morningstar Ltd. All Rights Reserved. Investment involves risk including possible loss of the principal amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. The value of shares of the Fund and the income accruing to them, if any, may fall or rise. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations. The fund may use or invest in financial derivative instruments and be subject to various risks (including for e.g. liquidity risk, interest rate risk, market risk, credit risk and management risk etc.) associated with such investments in financial derivative instruments. A fund's use of, or investment in, financial derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Participation in the markets for financial derivative instruments involves investment risks and transaction costs to which a fund may not be subject if such strategies are not used. Investors should consider the investment objectives, risks, charges and expenses carefully before investing.
