INVESTMENT OBJECTIVE

The Fund seeks to achieve a positive absolute return for investors regardless of market movements through a combination of capital growth and income on your investment regardless of market conditions in a manner consistent with the principles of environmental, social and governance (‘ESG’) investing. The Fund will seek to achieve this investment objective by taking long, synthetic long and synthetic short investment exposures. The Fund will seek to gain at least 70% of its investment exposure through equities and equity-related securities (including derivatives) of, or giving exposure to, companies incorporated or listed in the Asia Pacific region, including Australia and Japan. The Fund will seek to achieve this investment objective by investing at least 70% of its total assets in equities and equity-related securities and, when determined appropriate, cash and near-cash instruments. The Fund will be highly diversified across the universe of equities in the Asia Pacific region, including Australia and Japan, whilst seeking to minimise net exposure to underlying equity markets within the region.
